

# ESG COCKPIT

MEASURE & MANAGE  
SUSTAINABILITY PERFORMANCE

How sustainable is your organization, how social? Do you produce in a CO2-neutral way? With the **web-based software ESG Cockpit** you can easily find it out: You quickly have **data** at your fingertips that you can use for **certifications** and **communication** and for your **sustainability strategies**. This is how you remain **fit for the future** and **resilient** through times of crisis.

## *Simply digital to the sustainability report*

No data chaos, no isolated solutions:

With the ESG Cockpit, **collecting sustainability data** and **automatically creating individual sustainability reports**, e.g., according to **NFI guidelines**, is easy.

**Reporting & management** according to all common standards such as **ISO1400, EMAS, GRI, CDP, AWK, GHG Protocol (climate balances)**, including **SDGs** and **common good economics**. Integrate CSR strategically into your corporate culture!

## *For all forms of organizations*

The tool is configurable for different application requirements by the users and therefore suitable **for small as well as large companies and organizations**.

Examine the entire organization, HR areas or **upstream chains** – potential savings in a variety of ways!

*Numerous Austrian and international companies and organizations as well as public administration institutions use the ESG Cockpit.*

## *On the pulse of time with SDGs or the Common Good Approach*

The ESG Cockpit is updated on an ongoing basis according to the upcoming sustainability trends and topics.

For this purpose, we cooperate among others **with the Austrian Federal Environment Agency**. Together, **we keep an eye on all key figures and (legal) developments around sustainability**. We also work together with those responsible for standard development, e.g. with **Forum Tomorrow**, which is why the tool now also has a **Common Good module**.

- Analyze **future viability**
- Find **optimization possibilities**
- **Set goals**
- **Monitor the implementation**
- **Communicate results**
- **Obtain certificates easily**

- **Web-based** or **in-house**
- **Benchmarks** for **years, time series, locations, projects, scenarios, products, ...**
- **Interfaces** for **own data, sources and systems**
- **Configurable input, configurable output**
- **Input data synchronously used for outputs according to several standards**

## The ESG Cockpit performance portfolio

### Standards modules

The ESG Cockpit **includes all common and currently relevant guidelines and sustainability reporting standards.** These standards can be combined as required and then largely synchronously used – no parallel work!

- CLIMATE** Carbon footprint as a start toward climate friendliness
- GRI** Global Reporting Initiative
- EMAS** Eco Management and Audit Scheme
- AWK** Waste Management Concept
- NFRD** Non-Financial Reporting Directive  
(In Austria: NaDiVeG Sustainability and Diversity Improvement Act)

### The practical control tool for the evaluation of your CSR data

- GHG** Green House Gas Protocol
- GWÖ** Common Good Economy  
(compact or full balance sheet)
- CDP** Carbon Disclosure Project
- SDG** Sustainable Development Goals

### Function add-ons

- **Workflow mechanisms** with release, check and deadline or reminder function
- Calculate **backpacks**
- **Activate other language:** Currently the ESG-Cockpit is available in **German and English**

### Individually configurable in the web and in-house version

Check **presentation:** [esg-cockpit.com/presentation](http://esg-cockpit.com/presentation)

### Services

- **Consulting, training:** Introduction to the software and the topic of sustainability management; setup / configuration; support of initial implementation; data input, analysis and interpretation; training of team and other stakeholders
- **Analysis of data collection requirements & data structures on site**
- **Support in data management** and development of individual interfaces

### Service with lasting effects

- Development of supplementary **calculation logics** for sustainability indicators
- Comprehensive **sustainability strategy consulting**
- **Sustainability reporting**
- **Life cycle analyses**
