

# FIT FOR CSRD AND OTHER FLEXIBLE, EFFICIENT ESG REPORTING!

The ESG-Cockpit is **a web-based tool** that supports sustainability reporting in accordance with international standards, including ESRS, GRI and EMAS, and facilitates **professional environmental and social data management**.

# HOW SUSTAINABLE IS YOUR ORGANISATION?

*How social? Do you produce CO2-neutral?*

*More and more organisations and companies are **legally obliged** to answer these questions in reports.*

*However, the **requirements for standardised and meaningful ESG reports** - or parts thereof, such as carbon footprints - **are complex and often dynamic.***

***With the ESG Cockpit, you can create your sustainability report easily and digitally.***

*You quickly have **data** at hand that you can use for **reporting obligations, certifications and communication.** Simulate and plan your **sustainability strategy.** In this way, you remain **fit for the future** and are **resilient** even in times of crisis.*

# COLLECTING DATA AND CALCULATING KEY FIGURES

Efficient ESG management is **data-driven**.

Data must be **reusable** for various ESG reports.

## Flexible ESG data management:

With the ESG cockpit, you have all data in one digital system - transparent and traceable. Data is entered manually or via interfaces and imports.

## Flexible ESG reporting:

Laws and regulations continue to evolve - and so does the ESG Cockpit.

Use your data to create reports in accordance with current standards.

e.g.: **ESRS, GRI, CCF according to GHG Protocol, EMAS, Common Good Matrix**

... or entirely individually, fitting your need for financing or as part of the supply chain.

# YOUR ADVANTAGE

*The ESG Cockpit functions  
at a glance.*

## Central data storage & traceability

No version problems and no effort when merging your files. Data origin and data quality are always documented.

## Data capture independent of location and auditable

Input for multiple locations and time periods via a graphical user interface. Specific role assignment for users supports secure and targeted work. Data analyses and audit role functions simplify verification processes.

## Calculate key figures, evaluate targets and strategies

- Across locations, products/services, years (or any other time reference)
- Scenarios for exploring and evaluating measures.

# YOUR ADVANTAGE

*The ESG Cockpit functions  
at a glance.*

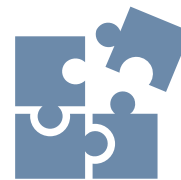

## **Guaranteed availability of the service**

in contrast to free offers on the web.

## **Independence**

All entered and calculated data can be exported in open formats.

## **The tool grows with changing demands**

Combination or switch to more comprehensive reporting schemes  
- e.g. CSRD obligation

## **The tool is flexibly adaptable**

depending on the size, type and sector of the organisation.

## **The data remains in the EU**

The tool is operated in European data centres in accordance with the latest security and data protection standards.

# CONFIGURABLE

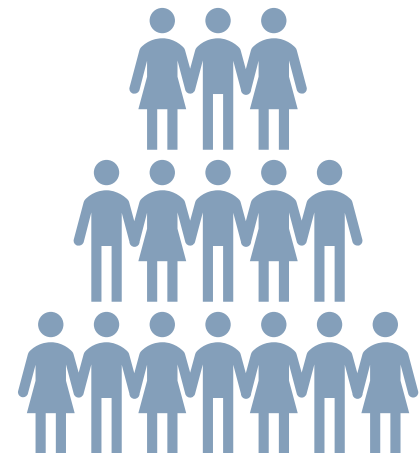

*Whether you are an association, sole trader,  
large corporation or public institution.*

***The ESG cockpit will adapt.***

## **One, two, many.**

The tool can be configured by the users themselves for different application requirements and is therefore **suitable for both small and large companies and organisations.**

With the ESG Cockpit, you can examine the entire organisation, HR areas or upstream and downstream value chains - exploit saving potentials in a variety of ways and keep an eye on target path achievement!

# 10 YEARS OF MARKET EXPERIENCE

*The ESG Cockpit is a well-engineered product that has been tried and tested by thousands of users.*

## Competence in digitalisation and sustainability.

The **ESG Cockpit** is a product of **akaryon**, an Austrian SME that has been developing **focused digitalisation projects on sustainability topics for over 25 years**. The ESG Cockpit was also initiated long before the relevant market requirements arrived in 2012 and benefited from **in-depth experience and practical input from users right from the start**.

With **more than 20 people in an interdisciplinary setup**, akaryon covers all competencies in-house. In addition, there are **complementary partnerships with research institutions and other competence organisations such as the Federal Environment Agency Austria** for emission calculations, **sustainability consultants, providers of related systems** - such as ranking/scoring, energy management.

The ESG Cockpit is used by **hundreds of customers in Austria, Germany and internationally**, and is **constantly being further developed**, e.g. in terms of reporting standards or emissions assessment.

**Consultants** who work with the ESG Cockpit **provide support with implementation**, all processes and strategically in context.

# ESG COCKPIT REPORTING STANDARDS

The ESG Cockpit includes **all current and relevant guidelines and sustainability reporting standards.**

These standards can be **combined as required** and can then be applied in a largely synchronized manner.

# ESG COCKPIT SERVICE PORTFOLIO

*In addition to reporting modules,  
cross-standard functions can be activated.*

*Individually **configurable** as a web  
or **in-house** version.*

*Service with a **lasting effect** for an  
**optimal workflow**.*

## Function add-ons

- **Workflow mechanisms** with release, check, deadline and reminder functions
- **Activate other languages:** Currently available in German and English; other languages on request
- **Documentation and evaluation of measures** and their **implementation**
- **Projections, scenarios, target paths**
- **ESG-oriented property management** for **vehicle fleet, buildings** and other **facilities**
- **Route analyses** to **optimise mobility**
- **Documentation** of **materiality** and **significance analyses**
- **Own custom emission factors**
- **Support with data management**, individual interfaces.

## Additional services

- **Consulting & training:** Introduction to the tool and the topic of sustainability management
- **Setup & configuration** of the tool
- **Support for initial implementation**, data entry, analysis & interpretation
- **Team and stakeholder** training
- **Analysis of data collection requirements** and data structures
- **Customised reports**
- **Scope 3 analyses, generation of emission factors**

# ESG PORTAL

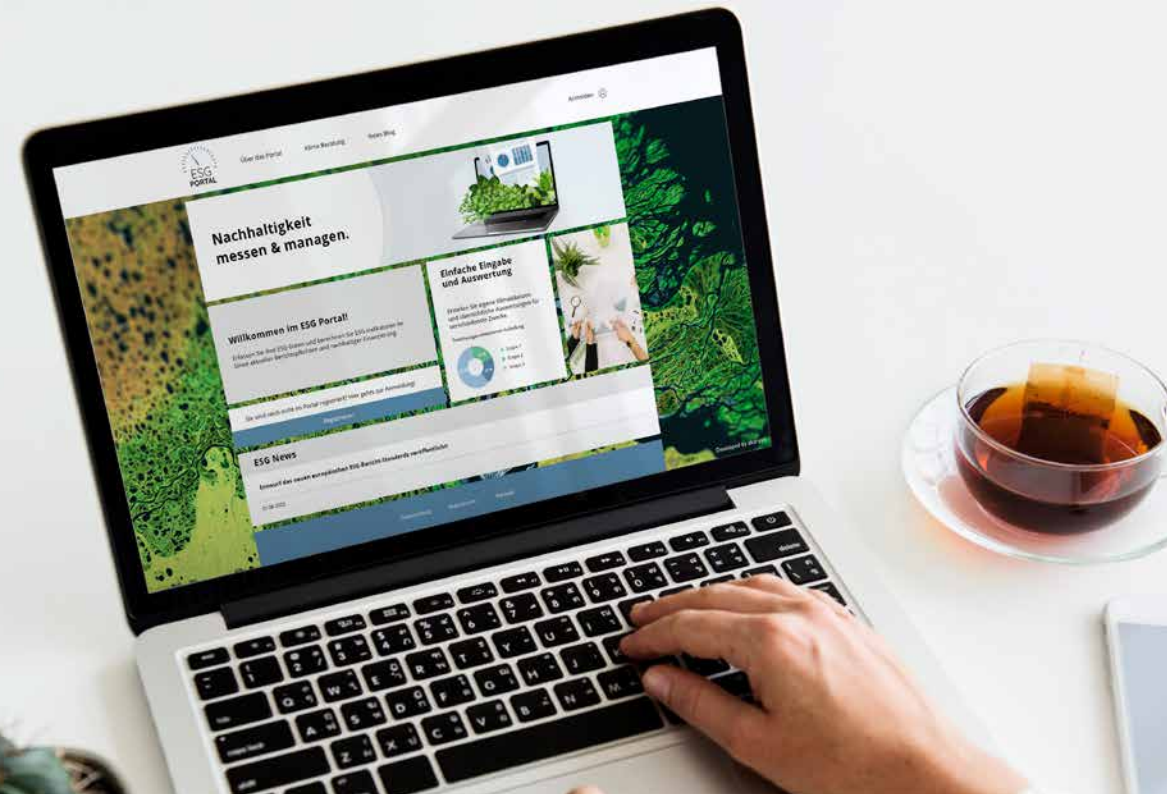

*The ESG Tool family is growing.*

***Get to know our ESG portal now!***

***Our recommendation for:  
Members, employees, suppliers,...***

## Simplified user interface and data input

for a large number of users with similar requirements,  
e.g. in 7 steps to a carbon footprint, portfolio screening, potential  
or mobility surveys.

# ESG COCKPIT & ESG PORTAL

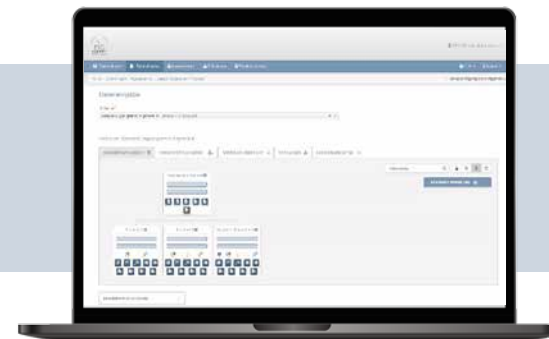

## *Customised data collection*

Login e.g. via SSO, self-registration or invitation to data collection for employees, members or suppliers

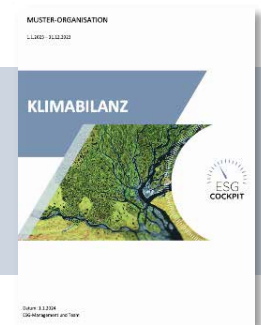

system or in-house database

## *Overall reporting*

Complex and flexible data collection for locations, properties, ...

## *ESG report*
